

CLAUD WHITE KILLED

IN ACCIDENT
Is Run Over by his Own Car and his Head Crushed when he Attempts To Crank Car Left in Gear.

One of the most tragic accidents that has ever occurred in Monett was the death of Claude White, widely resident of Monett and employee of the Frisco railroad company, which occurred about 3 o'clock this afternoon about 200 yards east of the Wimsatt brothers place just south of town. Mr. White had left his car in gear and started to crank the engine. When it started the car pushed him into a ditch and the rear wheel struck his head killing him almost instantly. The car never turned over.

Oscar Howerton was an eye witness to the accident, and quickly summoned Dr. A. Jones. Mr. White breathed a few minutes after Mr. Howerton reached him but died before the doctor arrived.

INCREASE GIVEN 400,000

RAIL WORKERS

Wage Bill of Nation's Steam Lines Is Increased \$22,125,000 by Action Labor Board.

Chicago, Oct. 14.—The wage bill of the nation's railroads was increased an estimated \$22,125,000 by a decision of the United States railroad labor board today granting increased pay of 2 cents an hour to over 400,000 maintenance of way employees.

Four of nine groups of the United Brotherhood of Maintenance of Way Employees and railroad shop workers were affected by the raise, the largest single group being common laborers. The decision raised minimum rates of pay for the classes affected from the present 23 and 35 cents to 25 and 37 cents.

Chairman Ben W. Hooper of the labor board in a statement following the decision said that the board based its findings on a general upward trend in wages since the board's decision of last July reducing wages for this and other groups of workers, and not on any pronounced change in living costs.

Today's decision marked a victory for the public group of the board which proposed the 2-cent increase, the proposal being rejected at first by the three members of the railroad group who favored no charge and the three members of the labor group who favored a much larger increase.

LEE
